Subject: Collector App
Attachments: Collector_Fields.xls

Cheryl/Joan: if you have time, take a look at the collector app fields in the attached spreadsheet. Feel free to add any new fields in column C, and include any drop down lists applicable to a field in column D. The two WD IPads should be ready for us by the time I get back on Thursday. For now, if you have the ESRI collector app on your phone you can search for Juneau collector map, called "Juneau_Mobile_Collector". To log into the app click on "ArcGIS Enterprise" then in the "Organization URL" box type in "http://epa.maps.arcgis.com". The app will remember this code after the first time. Then click on "EPA Enterprise", then click on "Login with EPA LAN User ID & Password, enter ID and password and submit. You should be in after that. The Juneau_Mobile_Collector app should be there. Just click on it and you are in. Feel free to play around with it, add locations, whatever. Its just a test version.

I hope to be back in town Tuesday night and working home Wednesday. Don't hesitate to text me if you need to get in touch anytime.

Thanks.
